WHERE IT GOES

This part in colour, its neighbours in grey

HOW TO MAKE IT AND HOW IT FITS

Feet: four blocks 12 x 12 x 14 mm.
Collar: a frame 192 x 127 mm outside, 175 x 110 inside, 4 mm tall.
Print the collar flat. It insulates: never use metal here.
Fit: glue a foot under each corner of the liner, 8 mm in from both edges. Glue the collar round the liner with its top flush with the liner's top edge.
The feet stand on the can floor and keep the liner 14 mm above it; the floor pouch has a relief at each foot.
Check: the liner stands level on its feet within 0.5 mm.

ColdPod liner feet (make 4) and collar: making sketch
