WHERE IT GOES
This part in colour, its neighbours in grey

HOW TO MAKE IT AND HOW IT FITS

Floor 170 x 105 x 2 mm with two dividers 2 mm thick and 60 tall, 17 mm each side of the centre, running the full length.

Holds 24 pens of 16 mm, three pairs across and four layers up.

Print floor down.

Fit: drops into the liner with 1 mm all round.

The payload probe vial (10 x 40 mm) lies across the top layer at the cooling end, held by its clip on the liner end wall.

Check: a 16 mm rod slides freely between each divider and the wall.

ColdPod payload rack: making sketch
