WHERE IT GOES

This part in colour, its neighbours in grey

HOW TO MAKE IT AND HOW IT FITS

Plate 98 x 52 x 3.5 mm with a 42 x 42 window for the Peltier module.

Four 3.5 mm holes 26 up from the bottom edge: two at 24.5 each side (module clamp screws pass) and two at 44 each side (frame screws).

Drip tray along the bottom edge: floor 68 x 13.5 x 2 mm with 2 mm lips at both ends, reaching back to the shell.

Drain hole 5 mm, 3.5 mm from the shell end, 30 toward the front.

The plate is thinner than the module (4 mm), so the clamp force goes through the module, not the frame.

Fit: plate on the block's front rim; M3 screws into the shell towers.

Check: 0.5 mm gap between the plate and the heat sink.
