WHERE IT GOES

This part in colour, its neighbours in grey

HOW TO MAKE IT AND HOW IT FITS

Block 36 x 140 x 12 mm with four pockets 32.4 mm across and 10 deep on a 34 mm pitch; 2 mm floor under each pocket.
Drill two 3.4 mm screw holes between the middle pockets for the bay floor.
Fit: screwed to the bay floor against the end wall; the four cells stand in the pockets, the BMS sits on top of them, and a hook and loop strap holds the pack down.
Check: each cell drops in without force and does not rattle.
