WHERE IT GOES
This part in colour, its neighbours in grey

HOW TO MAKE IT AND HOW IT FITS

A shallow tray 204 x 139 mm outside, 16.5 mm deep, folded from one 1.5 mm blank; the corners are notched and left open.

Fold a 6 mm lip inward all round the top edge.

Bottom flat within 0.3 mm: it lands on the can's rim flange.

Fit: the lid PCM pack goes in through the lip opening; the lip is bonded to the underside of the VIP lid plug with acrylic foam tape.

The bottom lands on the can's rim flange with 5.5 mm of overlap.

Check: 0.5 mm all round between the tray and the VIP walls.

ColdPod lid cold plate tray: making sketch
