WHERE IT GOES

This part in colour, its neighbours in grey

HOW TO MAKE IT AND HOW IT FITS

Slab 261 x 196 x 5 mm.
Two M3 heat-set inserts per latch keeper on the top, 72 each side of centre, 5 mm in from the front edge; insert depth 4 mm at most.
6 mm magnet pocket in the cooling-end edge for the lid switch.
Underside: bond a closed-cell EPDM strip 10 x 3 mm all round over the shell rim, and the VIP lid plug in the middle (acrylic foam tape).
Fit: sits on the shell rim; the two draw latches pull it down.
Check: the gasket touches the rim all round before the latches close.

ColdPod lid cap: making sketch
